

The SY-420/ SY-440 controllers are designed to control several doors in several different work modes. Each controller contains an internal software which can be accessed from any browser.

Does not require the installation of any dedicated software for the purpose of performing work definitions, authorized persons and viewing the controlled person's movements.

Access can be restricted to authorized personnel only for any door attached to the SY-420/SY-440 controller.

Specifications
