

ACCESS CONTROL

Employee and visitor access control and management

- Remotely define access rules and prevent unauthorized entry for employees, visitors, contractors, night crews.
- Apply access control to outdoor entrances or internal doors, rooms or hallways, as well as to garages, gates, and a variety of other barriers.
- Many weatherproof solutions are available for exposed locations.
- Select from a variety of employee authentication methods in any combination, including biometric data collection (fingerprint or facial recognition), barcode or magnetic badges, pin ID, and more, for ultimate multi-level authentication.
- Provide real-time data collection insight and reports, including the option for synchronized real-time dynamic mapping.
- Integrate access control easily with existing time and attendance, intrusion systems and fire alarm systems for complete workforce management and control.

Criteria	Barcode/Magnetic Badges	Proximity/HID Reader	Fingerprint Reader	Facial Recognition	PIN
Employee hands, specifically fingers, are frequently or always covered during shifts.	✓	✓	—	✓	✓
Employee faces are frequently or always covered during shifts.	✓	✓	✓	—	✓
Employee are unable to carry badges, ID cards, or other physical credentials on their person during shifts.	—	—	✓	✓	✓
