

GENESIS TIMECARD EXPORT LAYOUT

Genesis uses the same layout for time card exports as TA100 uses. If you are unfamiliar with this export or need to use the fields defined for your own custom interface, use the following layout.

Reminder: You will only get these exact field lengths if you use the "version 4" or the "System Data Format" layouts, otherwise all spaces within the fields will be removed and they will be separated with a comma, a space, or whatever you decide the separator should be.

Field	Length	Description
1	4	Division number of the clock of the IN punch of this day
2	10	Employee number
3	10	Group code
4	10	Level 0 number
5	10	Level 1 number
6	10	Level 2 number
7	10	Level 3 number
8	10	Company policy number
9	1	Shift number currently working
10	1	Shift number assigned
11	1	Holiday (Y for Yes, N for No)
12	1	Type of time (R for Regular, M for Miscellaneous entry, \$ for dollars)
13	1	Overtime type (0 for regular, 1 for OT1, 2 for OT2, D for dollars)
14	4	Category code ("WORK," "VAC," "TIP1," etc.)
15	8	Hours
16	8	Date (Does not include "/")
17	6	Time
18	1	Contains quantities (Y for Yes, N for No)
19	10	Blank
20	10	Blank
21	1	Is this record paid (Y for Yes, N for No)
22	1	Shift differential (Y for Yes, N for No)
23	1	Multiplier (+ or *)
24	6	Differential rate
25	3	Shift group used
TOTAL	152	

The generic export contains only 6 fields and doesn't produce job-costing data.

Field	Length	Description
1	4	Company number
2	10	Employee number
3	3	Company policy number
4	4	Level 0 number
5	4	Field ID number specified in the export area of the category
6	10	Amount
TOTAL	35
