

WEBCLOCK MODULE

Use your favorite web browser to clock in and out for online operation with desktop convenience

- Eliminates the unavoidable errors associated with manual data collection.
- Easy to operate.
- Works with any major web browser.
- Provides employee self-service functionality like viewing timecards, benefits and schedules.
- Employee status board shows real-time in/out data.
- Supervisor security access to employee information.
- No hardware required (computer with Internet access and browser needed).
- No client-side installation required.
- Easy to maintain and upgrade.
- Employees can access from their desktop or shared workstation.
- Functions in real-time operation.

The screenshot shows the WebClock interface for TIME AMERICA INC. The user's badge number is 00001. The interface includes a navigation bar with options like 'Clock Functions', 'Time Sheet Submittal', 'Timecard', 'Schedule', 'Benefits', 'Transactions', and 'Status Board'. The main area features a 'Choose Clock Function:' section with four buttons: 'CLOCKED IN' (green), 'ENTER DEPARTMENT' (blue), 'OUT FOR LUNCH' (blue), and 'CLOCKED OUT' (red). The date and time are displayed as 06/03/16 01:42 PM.

The screenshot shows the 'Submittal Time Sheet' for the week of 05/29/16. The interface includes a navigation bar with options like 'Clock Functions', 'Time Sheet Submittal', 'Timecard', 'Schedule', 'Benefits', 'Transactions', and 'Status Board'. The main area features a table with columns for 'Date', 'Hours', 'ENTER DEPARTMENT', and 'Clock In/Out'. The table lists the user's work schedule for each day of the week, including the number of shifts worked and the department entered. The total hours for the week are displayed at the bottom.

Date	Hours	ENTER DEPARTMENT	Clock In/Out
05/29/16 - Sunday			
05/30/16 - Monday			
05/31/16 - Tuesday			
06/01/16 - Wednesday			
06/02/16 - Thursday			
06/03/16 - Friday			
06/04/16 - Saturday			
Total			

WebClock can record employee time and provide employees self-service access conveniently from any web browser, which allows for fast deployment and easy installation. Upgrades are done on the server, so they are made available to all employees instantly. The system is so user friendly, it makes training obsolete.

Automating your data collection process via WebClock reduces payroll costs and errors by eliminating mistakes associated with conventional, manual entry.
